

HETVI H. RADADIYA

hetvihadadiya@gmail.com — LinkedIn — GitHub — LeetCode — Kaggle

Summary

Computer Science undergraduate with research interests in Machine Learning, Deep Learning, and Computer Vision. Experience in satellite image processing, adversarial robustness research, and academic model development. Interested in building practical AI systems and research-driven solutions.

Education

B.Tech in Computer Science and Engineering Jul 2023 – Present
Charotar University of Science and Technology (CHARUSAT)
CGPA: 9.44 / 10.00

Technical Skills

Programming: Python, C, C++

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Image Processing

Libraries & Tools: NumPy, Pandas, TensorFlow, Jupyter Notebook, Gradio, Roboflow

Core CS: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks

Internships

Machine Learning Intern – AI Quantum Smart Solutions May 2025 – Jun 2025
Tools: Python, TensorFlow, OpenCV, NumPy

- Completed internship focused on ML, DL, and Image Processing.
- Developed SAR image despeckling system for satellite imagery noise removal.
- Implemented preprocessing, model training, and evaluation workflows.

Research Intern – Symbiosis Centre for Applied Artificial Intelligence Jul 2025 – Present
Tools: PyTorch, Adversarial ML, Medical Imaging

- Studied adversarial attacks and robustness in healthcare deep learning models.
- Conducted experiments and contributed to research paper preparation.

Projects

Image Captioning Model 2024
Tools: Python, TensorFlow, CNN, LSTM, Gradio, NumPy, Pandas

- Built CNN-LSTM model to generate captions for images.
- Developed interactive dashboard for real-time caption generation.
- Improved performance through hyperparameter tuning and dataset optimization.

SAR Image Despeckling 2025
Tools: Python, TensorFlow, CNN, OpenCV, NumPy

- Removed speckle noise from large SAR images using patch-based deep learning.
- Reconstructed full-resolution outputs by merging processed patches.

iBit: Geological Feature Detection 2025
Tools: Python, Roboflow, OpenCV, Computer Vision

- Annotated stone images with 50+ geological features.
- Applied computer vision techniques for feature detection and visualization.

Conference Paper

TACNet: Architecture for SAR Image Despeckling 2025
Presented at MoSICom 2025

- Proposed hybrid Transformer-Attention-CNN architecture.
- Conducted experimental evaluation and model performance analysis.

Leadership

Secretary – IEEE Computer Society Student Branch Sep 2025 – Present

Treasurer – IEEE WIE Affinity Group Mar 2025 – Sep 2025
